

TAB-TENSIONED MOTORIZED SCREEN

Tab-Tension electric projection screens. Its primary identifiable feature is the tab-tension reinforcements at the sides of the material which enhance superior flatness levels on the screen. Motorized Screen type usually is better for multi-purpose home theater where need to rise or down the screen frequently. Our screens are using high quality motors which assure the screen up and down freely and durable flat for long time using. The user no need to operate the screen manually which decreases risk of “pull-and-release”-damages on the screen. Octagonal sheet case, graceful design

Features of Screen:

- * Durable black casing for wall/ceiling installations
- * Tab-tension system provides a uniform screen flatness
- * 2Black masking borders with black material backing.
- * 4K Ultra HD, Active 3D, and HDR Ready
- * Designed for controlled and uniform rolling of screen fabric, the motor (Tubular Motor) is concealed within the roller, which ensures smooth and quiet operation FORMAT 4:3, 16:9, 16:10.
- * AMERICAN Fabric matte white | FIBER GLASS FABRIC
- * Available in superior imported viewing surfaces which are best suited for Front projection.
- * Electrically operated 220V, AC 50Hz single-phase motor mounted inside roller tube 3-wire instantly reversible type with brake.
- * Equipped with internal thermal overload protection. Preset limit switch setting automatically

Available Sizes

S.NO	SIZE DIAGONAL	VIEW AREA (INCH)	RATIO
1	77"	38 x 67	16:9
2	92"	45 x 80	16:9
3	100"	49 x 87	16:9
4	106"	52 x 92	16:9
5	110"	54 x 96	16:9
6	120"	59 x 105	16:9
