

VOICE TRACKER

OS-VT360

“Ordain is excited to add support for the Sennheiser Team-Connect Ceiling 2 to the controller, Voice Tracker OS-VT360 as a built-in Linux based architecture having Web Server that is capable to control the Camera automatically on Standard VISCA Protocol Using IP and RS232 Modes. The Controller is capable to create, manage and recall the camera presets automatically in the real-time, the vertical and horizontal angles of the detected person speaking. The Controller has an easy GUI configuration where the user can add the devices such as Ceiling Microphone and Camera, also creating room layout as per the actual room dimensions, including seating PAX details. The Controller has drag and drop seat allocation as per the actual room layouts, managing tile microphone angle, values to be mentioned to recall the camera presets upon the active speaker. The controller is capable to set the zones and exclusion angle in Microphone Tile.

Specification	
Processor	Intel core i3 6th Gen
RAM	4 GB
SSD	128 GB
Connectivity	Lan (Ethernet)
Operating System	Linux
Temperature	Operating 5°C~45°C Storage -10°C~50°C
Net Weight	1 Kg
Power Input	12-19 V DC IN

Tested & Certified with Sennheiser Microphone Tile
